

DEPLOYMENTS HKW PROJECT FIRST YEAR, OVERVIEW

The times given below are the time of first and last valid measurement for the deployment. Time are given in UTC.

The main positions are HKWA and HKWB. In addition, there is a 3rd position, called HKWC, close to HKWB.

Altogether 3 buoys have been used during the first 12 months; WS187, WS188 and WS170.

DEPLOYMENTS HKW

1. **HKWA** (WS187) 5th February 2019 12:20 – 21st September 00:00
 - a. Config updated (higher wind speed resolution) through Wi-Fi on 19th September 11:40 while the buoy was in the sea
2. **HKWB** (WS188) 10th February 2019 09:00 – 19th September 09:20
3. **HKWC** (WS170) 15th June 2019 10:00 – 24th November 08:30
 - a. 16th June 00:00 – 11th August 21:00 In-situ validation against WS188 and WS187
 - b. Data to be used for HKW project from 11th August onwards
 - c. Data included in 9/12M data set from 1st August 00:00
 - d. Config updated (higher wind speed resolution) through Wi-Fi on 19th September 06:20 while the buoy was in the sea
4. **HKWA** (WS188) 21st September 2019 13:50 – 24th November 07:30
5. **HKWA** (WS187) 24th November 2019 08:00 – 14th February 2020 23:50
6. **HKWC** (WS188) 18th December 2019 09:20 – 7th February 2020 18:40
 - a. Buoy on drift 7th February 2020, rescued 8th February and brought to land
